

Procedure for installing the MAS patch program (Patch9.0.0.3)

In just a few steps, you can upgrade your MAS version in minutes. Before installing the MAS patch program, please make sure that you already have the MAS program (Version 6 or above) installed to your PC. It is also recommended for you to backup your existing database.

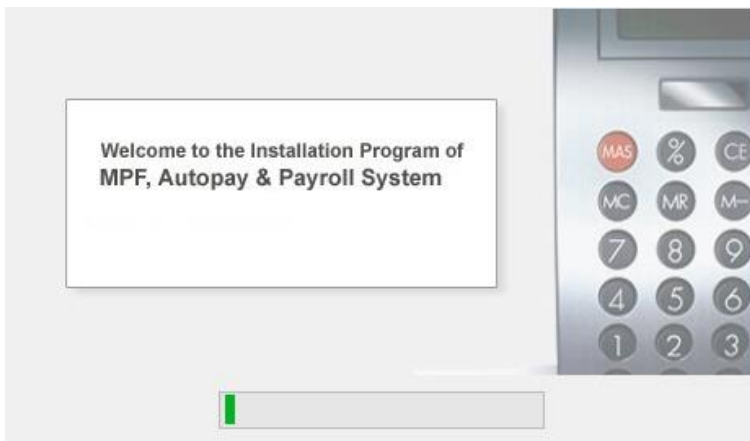

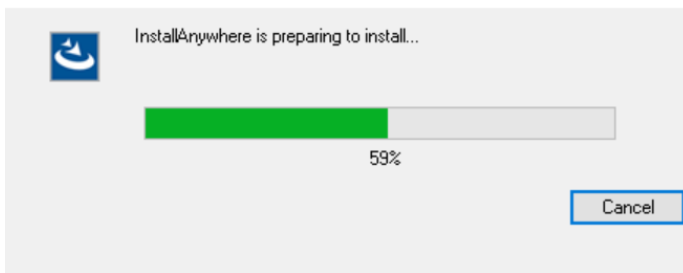

Also, please close all other applications as they may affect the installation, and log in to Windows with a user account having **administrator or power user right** for installation.

Step 1

Insert the CD into CD ROM drive and then double click the patch program “**patch v 9.0.0.3 of MAS.exe**” in file explorer.

InstallAnywhere

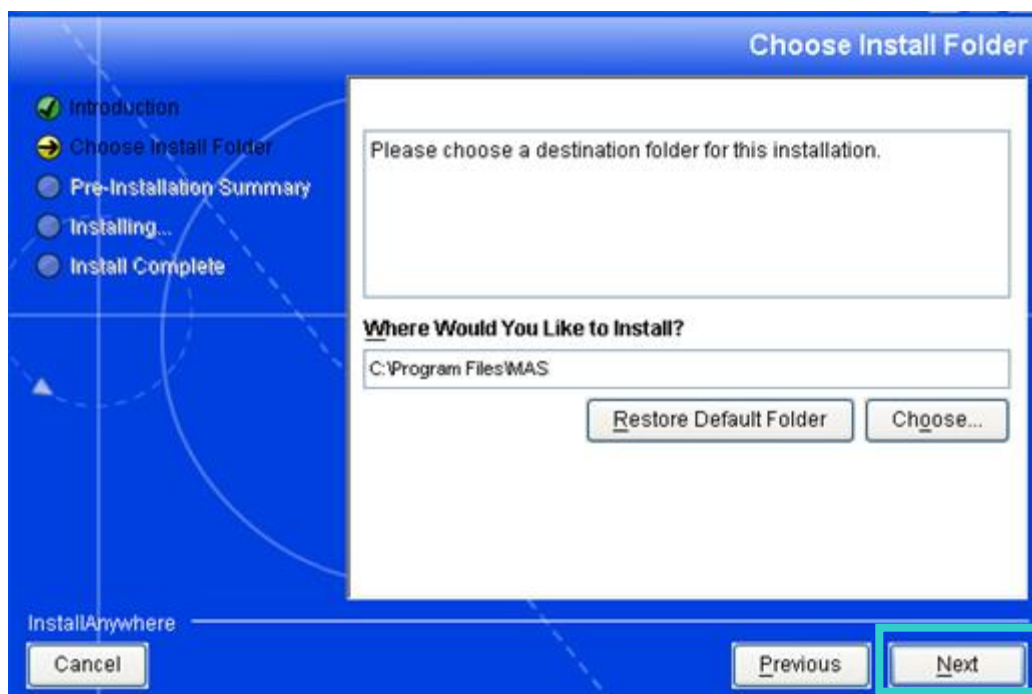

Step 2

The installation programme is now running. Click “Next” to continue.

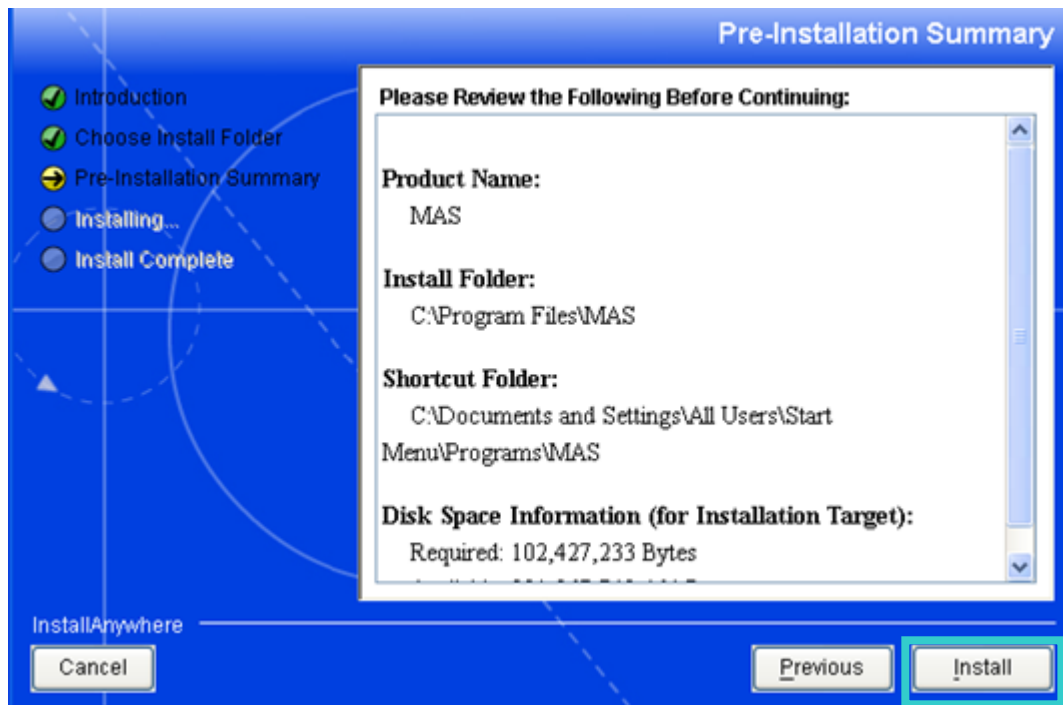

Step 3

Use the default folder to patch your existing MAS program. Click “Next” to continue.

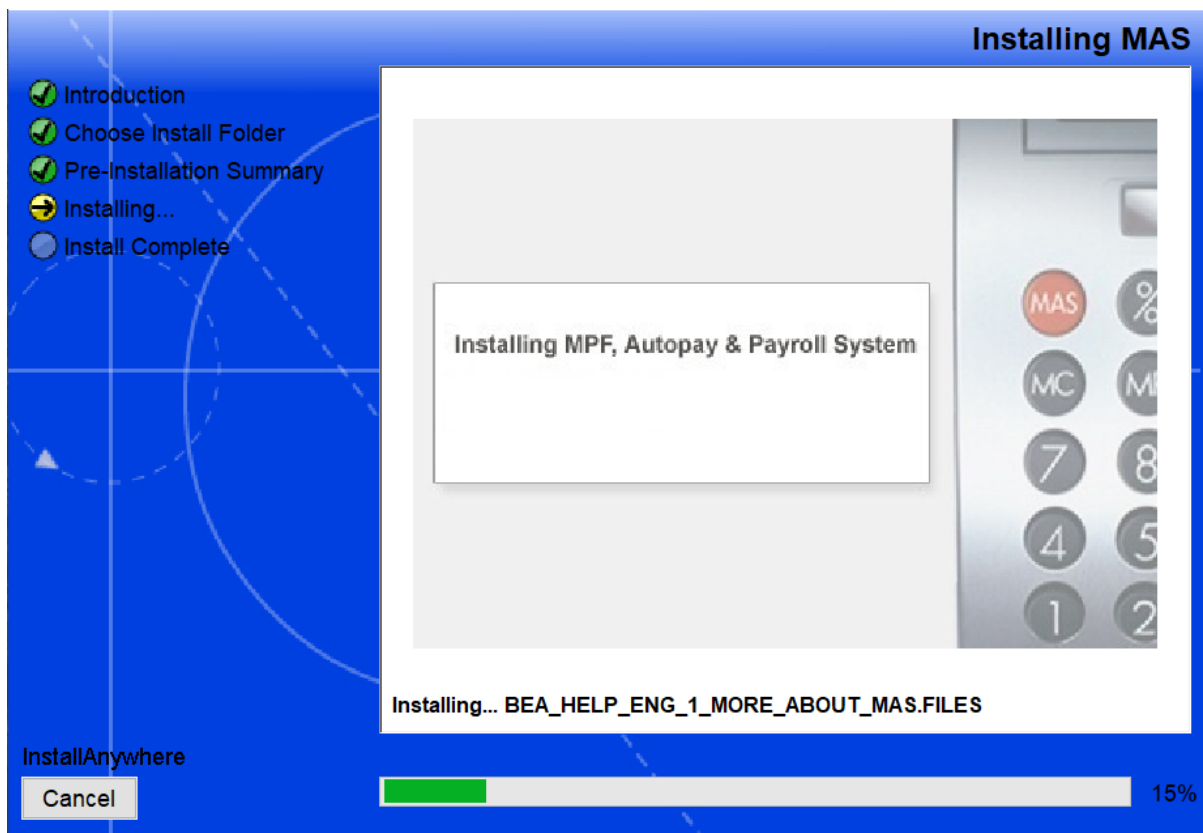

Step 4

Please check the current settings and then click “Install” to confirm installation. If the information is incorrect, click “Previous” to go back and change the settings.

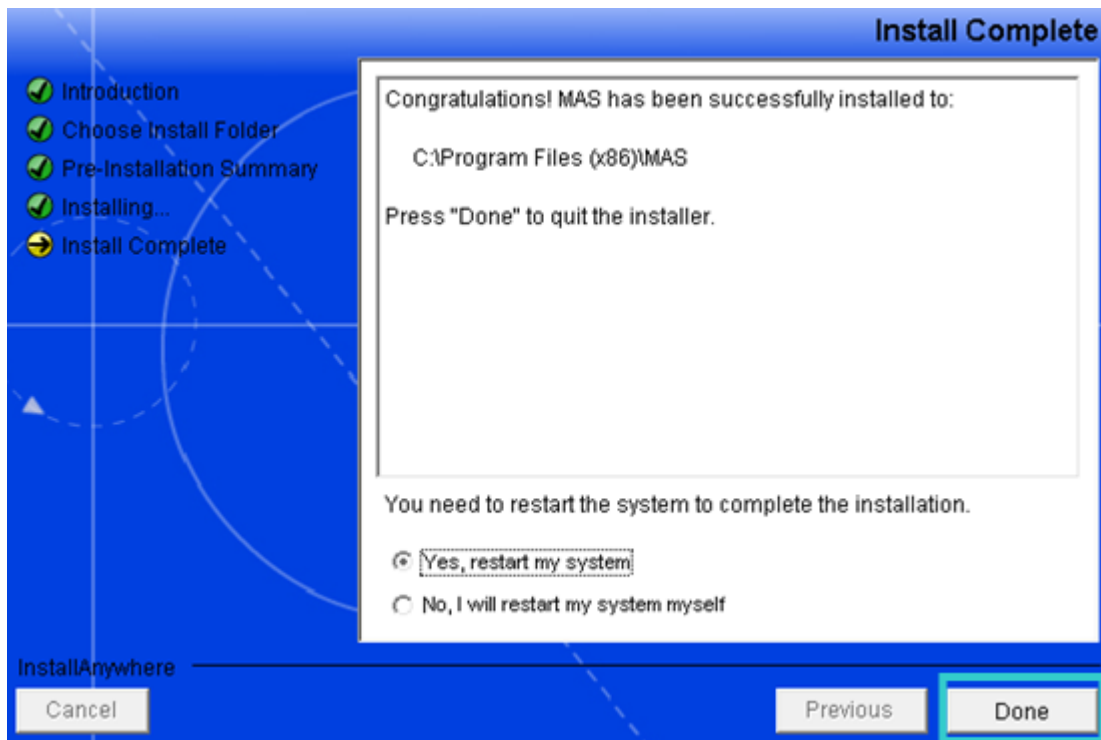

MAS9.0 may take a while to install; please wait.

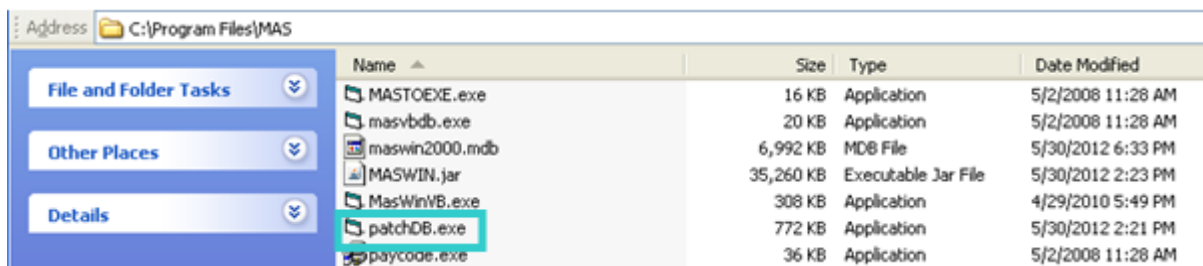

Step 5

Click “**Done**” to complete the installation. After that, system will auto restart the PC.

Step 6

Double click “patchDB.exe” in the location where the MAS has been installed (By default, the MAS is installed in C:\Program Files\MAS) to patch your existing database to the new MAS8 version.

Note: After double clicking “patchDB.exe”, no other windows or messages will be prompted. The patch has been successfully executed, and you may proceed to Step 7.

Step 7

Log in to MAS to check that you have successfully installed the patch program.

Go to **[Help] > [About MAS] > [Enhancement in this version]**, to see the current version installed.
